SUBJECT: ISSUE PROFILE – STATUS OF THE CITY'S FINANCES (MARCH 2007)

Transmitted herewith are copies of a new report prepared by the Office of Council Services, "Issue Profile – Status of the City's Finances (March 2007)." The report contains an overview of certain financial and budget trends and a review of the prior year's revenues and expenditures, which we report to the Council annually.

I hope you find the report useful in considering the new city budget.

I. Introduction

We are pleased to issue another annual report on the status of the city's finances and budget. As in the previous report, there is an overview of certain fiscal trends which is intended to provide a historical and comparative context to review the upcoming city budget (see Chapter II). We have also reviewed the prior year's revenues and expenditures for the operating budget and the mid-year status of the current year's major revenue assumptions and major operating budget expenditure items (see Chapter III). Finally, we report on the status of the prior year's capital budget appropriations (see Chapter IV).

These reports are based on the audited financial report of the city, the executive operating and capital budget ordinances and any amendments thereto, the executive program and budget documents, the legislative budget ordinances, as well as the monthly accounting reports from the department of budget and fiscal services. Other sources are referenced in Chapter V.

We hope you find this report useful in considering the city's proposed budget for the coming fiscal year.

This page is intentionally blank

II. Budget Trends

In this section, we provide a brief overview of the city's budget and financial status, as reflected in certain key statistics, and compare the city with other jurisdictions. This is intended to provide a historical and comparative perspective that may be useful for evaluating the specifics about the next fiscal year's city budget. For more detail on specific subjects, please consult the data sources listed in Chapter V.

A. Special Focus Section

- **Maintenance Spending on Roads Remains Inconsistent**

In this section, we analyze the data on road taxes, miles driven, and spending on road maintenance to determine how whether the city's maintenance is keeping up with road use.

While vehicle taxes are catching up to Oahu's driving mileage...

Figure A-1. Tax revenues (adjusted for inflation) per 1,000 vehicle miles traveled on Oahu initially climbed through 1990, but declined for years thereafter, placing greater financial stress on the city's road maintenance program. Beginning in 2003, however, revenues have begun to rise again, though remain less than 1990 levels after adjusting for inflation. (2006 data is preliminary.)

Figure A-2. Even if revenues per mile driven had remained steady, that would not have ensured that actual spending on road maintenance would have kept up with the ongoing rise in vehicular mileage. The chart below shows that actual spending has been inconsistent, swinging from a typical range between \$5 and 9 million to \$47 million, \$38 million, and \$30 million in FY 2001, 2004, and 2006, respectively. (Although data on the city's in-house road maintenance program was unavailable and not included, such spending would not be expected to significantly alter the results shown.)

...spending on road maintenance is still inconsistent

B. Financial Position – Net Assets

- **The City's Finances Have Begun to Improve**

In its annual accounting reports, the city's financial position is reported as a computation of "net assets". The amount of net assets is what results after subtracting what the city owes (termed "liabilities", such as outstanding bills, bonds, and claims and judgments against the city) from what owns (termed "assets", such as cash, investments, and the value of land, buildings, and infrastructure). The size of the net asset figure can be interpreted as representing the city's ability to cover its costs and continue to pay for services in the future. Increases or decreases in net assets over time indicate whether the city's financial position is improving or deteriorating.

The city's net assets are divided into those supported primarily by taxes, termed governmental activities, versus those that are supported at least to some extent by user fees, termed business activities. The city's enterprise funds for housing and the bus, solid waste, and sewer systems are classified as the business activities of the city.

The Board of Water Supply is a semi-autonomous agency of the city and is not included in the financial results reported here. The board reports on its finances separately from the city.

While the city's finances are improving...

Figure B-1. In 2006, the city recorded its first gain in net assets since it began reporting its net assets in FY 2002. Previously, revenues have been less than expenses, leading to a fall in net asset values, though the values remained in positive territory. In FY 2006, net assets were at \$981 billion, composed of \$251 million in governmental assets and \$731 million in business assets. The positive results were due to gains in business assets over the prior year which more than offset continuing losses in governmental assets.

Figure B-2. In FY 2005, the neighbor islands continued their positive trends in comparison to the city's negative performance. The net assets of Hawaii County rose nearly nine percent while Maui and Kauai showed a two-percent rise, which still compared favorably to Honolulu's four-percent slip.

... the city continues to under-perform the neighbor islands

C. Size of the City Budget

- Is City Spending High or Low? Depends on What It's Compared To

One way to measure the size and level of activity of a government entity is by examining the amount of government spending. Spending can be viewed as the most basic measure of government, since the level of spending drives tax policy, debt policy, and employment policy.

Government spending on operations is controlled through the operating budget. In this section, spending on operations is examined to see how the City and County of Honolulu's spending has grown over time, and how it compares to other jurisdictions. We also compare the spending levels over time to the levels of taxes and other revenues, as well as to the incomes of residents.

Figure C-1. The rise in property tax revenues, while sharp in recent years, still trails the rise in the city's operating expenditures over the last 20 years. However, property tax revenues are likely to catch up to the growth in expenditures soon after 2006.

Figure C-2. The city's operating expenses largely reflect the cost of salaries and benefits (including benefits for retired employees). The largest single revenue source is the property tax, accounting for over a third of operating budget resources. While the number of city employees has remained relatively steady, salary and benefit costs have increased faster than property tax revenues over the last 20 years, contributing to "structural deficits." However, taxes may soon catch up.

Figure C-3. Honolulu continues as the second lowest in its amount of spending on operations per resident among Hawaii's counties. Honolulu's \$1,474 in FY 2005 barely topped Hawaii County's \$1,435, but was significantly under Kauai's \$1,730, and Maui's \$2,141 per resident.

Honolulu's relatively low rank in per capita spending compared to the other counties may be due to the economies of scale the city enjoys in providing services for a large, mostly urban population, which contrasts with the smaller, more dispersed populations of the neighbor islands.

City and state spending per person surging past national average

Figure C-4. The combined spending between that of city and state government has always exceeded the national state-local average. But after years in which the gap seemed to narrow, that gap has seemingly widened based on the latest data. In FY 2004, spending by the city of \$2,387 per resident on both operations and capital outlays added to state government's \$5,749 resulted in a total of \$8,136, exceeding the national average of \$6,918 by \$1,218 per resident.

Figure C-5. If you compare the city's revenues from its own taxes and fees (which excludes city revenues from state and federal taxes and fees) to the personal incomes of Honolulu residents, that ratio has declined since 1997, when the ratio reached a high of 4.5 percent. By 2005, that ratio had declined to 3.6 percent, a level not seen since FY 1990. In other words, in the last eight years, although city taxes and fees have increased, they have come to represent a smaller share of residents' incomes.

City taxes and fees have grown less than incomes

Figure C-6. City spending on operations, measured on a per-resident basis, has grown slowly, up only 51 percent in 20 years, or 25 percentage points less than the rise in inflation over the period. But some components of spending have jumped in size. Among the major functional divisions in the budget, debt service has grown at the fastest rate, up more than seven times over the past 20 years. Public safety and the bus system have been the slowest growing over the period.

Figure C-7. Despite its slow growth rate, public safety has long dominated city spending on operations, measured on a per-resident basis. In FY 2006, it accounted for 23 percent of per-person costs. The next largest cost area was debt service, accounting for 16 percent. In the chart, “all other” represents cost areas not included in the other categories, such as employee benefits. If viewed as a single group, “all other” would be the largest category, accounting for 25 percent of spending in FY 2006.

The largest changes are made to the mayor's capital budget

Figure C-8. By charter, the council may add or delete any item upon receiving the mayor's and the council chair's proposed budgets, provided that sufficient revenues are approved to balance the budgets. Requests for budget changes may come from the public, individual councilmembers, or from the mayor's administration. In the ten fiscal years from 1998 to 2007, the council has made only modest changes to the total amount of the executive operating budget, with less than a percentage point difference between the mayor's proposed total versus the final approved amount. Changes to the capital budget have been larger and mostly in the form of increases, notably in 2002 with a 16 percent increase of \$81 million. Changes to the legislative budget show no clear pattern.

D. Debt Service and Total Debt

- **City Debt Growth Begins to Slow**

Most spending on construction and other long-lived assets in the capital budget is financed by bonds and other debt instruments. The repayment of the principal and interest on those debt instruments is called debt service.

Typically, most of the capital budget results in expenditures. The rest, usually between 10 and 20 percent, lapses, meaning certain projects or parts thereof were not implemented because priorities changed, projects were found to be unaffordable, or appropriations were not used because actual spending requirements were less than expected. Of the amount that is expended, the money usually comes from the issuance of bonds and other debt instruments. A portion of the rest of the budget is funded by cash from federal or state grant funds, or from the sewer fees deposited in the sewer fund.

The debt that is authorized to be incurred by the city is an amount represented by bonds already issued and bonds not yet issued. The amount of unissued bonds represents past capital budget appropriations that have not lapsed and are to be financed by bonds that have not yet been issued. It thus represents a backlog of debt to be incurred if the appropriations for capital projects contained in those past budgets are to be expended.

Relationship to construction spending. Spending on debt service as part of operations is distinct but related to spending on construction projects. Construction spending occurs first, and is authorized in the capital budget. That expenditure is mostly financed by incurring debt in the form of bonds, notes and commercial paper. A few years after the capital budget takes effect, repayment of the principal amount of the debt to finance the budget begins. Debt service payments are made from the operating budget. The debt service for any particular municipal bond issued by the city is paid over a long period, typically 30 years or more.

Construction spending information is recorded and reported in the city's financial reports in several ways: as an initial capital budget appropriation, as expenditures pursuant to the appropriation, as a yearly stream of repayments included in the operating budget to retire the debt that financed the initial outlay, and as an addition to the city's capital assets when a facility is completed followed by annual reductions thereto to record depreciation of the facility. Care must be taken to avoid confusing these numbers.

Debt per
person
dips...

Figure D-1. The chart reflects the total amount of debt authorized per Honolulu resident. The city's authorized debt per person has climbed steeply since the previous low in FY 1998. In FY 2006, however, authorized debt dipped to \$2,319 per resident.

Figure D-2. This chart shows how the amount of debt authorized has changed from the previous year over the last ten years. In FY 2006, the amount of authorized debt that was issued increased by \$67 million over the previous year, an increase of half the amount of FY 2005, while the amount yet unissued fell by \$243 million compared to the year before, the biggest drop in any debt statistic in a decade. Over the past three years, the amount of debt that was issued by the city has increased by an average of roughly \$111 million per year.

...along
with
authorized
debt

The city tops the neighbor islands in debt per person...

Figure D-3. Issued debt whose debt service payments are to be paid with property tax revenues is called net general bonded debt. In FY 2005, Honolulu moved higher among Hawaii's four counties in the amount of such debt when calculated on a per-resident basis. Honolulu's \$2,168 was followed by Maui at \$1,656, Hawaii at \$1,198, and Kauai at \$644. As previously shown, Honolulu's debt per person has trended sharply higher while that of the neighbor islands is either nearly flat or declining.

Figure D-4. On a per-person basis, the combined debt of the city and state government has grown slowly while the national state-local average has swung sharply higher. In FY 2004, the two amounts nearly converged after years of recording wide differences. This was possible not because the city's debt issuance slowed but because state government debt has stabilized, and because the trend in the national average of state-local debt has seen a strong acceleration.

... but combined city and state per-person debt is now only average, nationally

E. Real Property Taxes

• Residential Property Valuations and Tax Collections Continue to Soar

Property taxes remain the city's largest single source of operating revenues. Although the share that it represents had fallen over time as user fees have risen, that share grew to 40 percent in FY 2006, up from a low of 30 percent in FY 2002.

Property tax revenues are generated by applying tax rates, which are set annually by the City Council for each of the ten classes of real property, to the assessed value of each parcel of taxable real property, net of any applicable exemptions. That value is established by the city's real property assessment division according to prevailing market values for land and replacement cost for improvements.

Figure E-1. The value of property tax exemptions (i.e. value of exempt properties multiplied by the otherwise applicable tax rate) has risen over the last ten years. Nearly all tax exemptions (90 percent of total exemption value) benefit the improved residential, apartment, and commercial classes of properties, with improved residential accounting for the greatest share. In FY 2007, improved residential property exemptions represented foregone revenues of \$41 million, apartment properties \$15 million, and commercial properties \$20 million, for a total of \$76 million in foregone revenues from those property classes. In comparison, the exemptions for all other property classes represented just \$9 million in foregone revenues.

**Tax
exemptions
climb for
improved
residential**

**Although
revenues from
owners of
single family
residences
have jumped...**

Figure E-2. Real property tax collections have begun to sharply rise over the last several years due mostly to robust collections from the improved residential class. That growth has increased the share of total tax revenues obtained from residential properties (improved residential and apartment classes) compared to the share from business properties (hotel/resort, commercial, industrial, and other classes), although residential properties still account for less than their share of valuations (see figure E-3).

Figure E-3. Because the city has long adopted lower rates for residential properties as compared to business properties, residential properties have had a much lower ratio of revenue share to value share. That ratio is a measure of relative tax burden between such properties. (A class of property that generated 10 percent of total tax revenues and represented 10 percent of total property value would have a 100 percent ratio of revenue share to value share.) The gap in tax burden between the two types of properties reached a new high in FY 2007. In that year, improved residential properties provided 45 percent of tax revenues while representing 61 percent of property values, producing a share ratio of 73 percent. In contrast, commercial properties provided 18 percent of revenues while representing just 7 percent of valuations, a share ratio of 244 percent.

**...the tax burden
gap between
residential
and business
continues to
widen**

**Tax bills still
soar for
residential
properties...**

Figure E-4. The average tax bill for residential properties has soared, led strikingly by the bills for improved residential properties. In FY 2007, single family properties paid an average tax bill of \$2,131, up 23 percent or \$401 more than the prior year, while apartment properties paid an average bill of \$1,208, up 24 percent or \$230.

Figure E-5. Trends in the average tax bill for commercial, industrial and hotel properties have diverged from those for residential properties. In FY 2007, the average property tax bill for hotel and resort properties was \$10,353, a slight increase over the previous year. Commercial properties saw average tax bills rise 17 percent over the previous year to \$21,163, a new high. The average tax bill for industrial properties rose 15 percent over the previous year to \$16,996, double the low of \$8,456 in FY 2002.

**...and most
businesses
also see
increases**

The city's residential tax bills occupy the extremes among the counties...

Figure E-6. In FY 2007, Honolulu's average property tax bill for improved residential properties edged just above those of the neighbor islands (adding their homeowner or homestead classes together with their improved residential class). For example, Honolulu's average improved residential property tax of \$2,131 exceeded Kauai's effective average tax of \$2,078. (Note: there are minor comparability issues because of the neighbor islands' unique homeowner and homestead tax classes.) For apartment properties, Honolulu's average apartment tax of \$1,208 showed the effect of its average apartment property value of \$339,000 and tax rate of \$3.59 per \$1,000. Compare this to Hawaii County's average apartment property value of \$500,000 and tax rate of \$8.10 per \$1,000, resulting in an average apartment tax of \$4,051.

Figure E-7. In FY 2007, Honolulu's average property tax bills for hotel/resort, commercial, and industrial parcels exceeded those of the neighbor island counties, primarily because of Honolulu's higher tax rates. The exception was Hawaii County's hotel tax bills, which exceeded Honolulu's primarily because of the Hawaii County's high average hotel value of \$2.5 million, versus Honolulu's average hotel value of \$906,000.

...while the city's tax bills for businesses are mostly higher

F. Fund Balance and Budgeted Property Taxes

- **City's Budgeting for Reserves and Property Taxes is Questionable**

The general fund is the primary fund in the operating budget. It is a recommended budget practice and advantageous for bond ratings that there be a reserve amount in the general fund to pay for unexpected costs.

The city's practice has been to budget practically all of the revenues of the fund for expenditure each fiscal year, thereby providing for no reserve or fund balance. Yet by year's end, the city's general fund ends up with a large unbudgeted balance that is carried over to the next fiscal year. In fact, this carryover amount from the previous year is usually the second largest anticipated revenue source for the operating budget, next to property taxes. In FY 2007, the carryover from the previous year was forecast to account for eight percent of operating revenues.

While positive and reasonable balances in the general fund are desirable, wide disparities between budgeted and actual balances in the general fund are not. They indicate that substantial amounts of appropriations in the operating budget are not being implemented, perhaps systematically, or that revenues are being substantially, and perhaps systematically, under-estimated, or both. Similarly, while under-estimation of revenues from property taxes can be prudent, substantial and systemic under-estimates can be problematic. Thus, although conservative estimation helps to avoid mid-year deficits, excessive under-estimation means needed city services were not provided despite the availability of resources.

**Unbudgeted
year-end
general fund
reserves are
rising**

Figure F-1. The long-term trend in unbudgeted fund balances continues upward. The city's actual year-end general fund unreserved balances have been as high as \$77 million (in FY 2006), despite a budget that usually allocates little to no moneys for that purpose. (In the chart, the absence of a bar for the fiscal year means the budgeted amount for general fund balance was near zero.)

Figure F-2. Over the last ten years, the amount of revenues anticipated in the budget to be obtained from real property taxes have been below actual receipts, as much as \$12 million under actual in FY 1998 and FY 2006.

**Property tax
revenues
come in
much
higher than
estimate**

G. Enterprise Funds

• Enterprise Funds Show Mixed Results

Enterprise funds are used to account for certain government activities that are run like businesses and that charge fees to offset operating costs. The city has four enterprise funds: one each for the bus system, the solid waste collection and disposal system (including the H-Power garbage to energy plant), housing projects, and the sewer system. The significance of an enterprise fund's net asset amount is that it shows the financial position of the activity if operations ceased at the end of the period. For example, a positive net asset amount for the year ending June 30 would indicate that as of that date, the city could repay all outstanding debts of the activity and still fully own the buildings and equipment used by the activity. In contrast, a negative net asset amount would indicate that if operations ceased as of that date, the city would owe money to others. The annual change in net assets shows whether the fund financially improved or deteriorated during the subject year.

Figure G-1. The net assets of the city's enterprise funds recorded mixed results in FY 2006. The bus fund recorded \$172 million in net assets, a \$13.6 million fall from the previous year. While the net assets of the solid waste fund posted the seventh straight year of negative net assets at -\$104 million in FY 2006, that was \$13 million better than the year before. Net assets for the housing fund in FY 2006 were -\$3 million, down \$3 million from the previous year. The sewer fund continued the strongest posting among the funds at \$666 million, up \$11 million from the prior year.

**Sewer Fund
Improves,
Bus Fund
Declines**

III. Executive Operating Budget

Actual Versus Budgeted Revenues And Expenditures, FY 2006 And FY 2007

This is a comparison of actual versus budgeted revenues and expenditures for the executive operating budget. The review covered all of FY 2006 and six months of FY 2007 through December 31, 2006. Our review is based on the information in the FY 2006 and FY 2007 Executive Program and Budget documents, the executive operating budget ordinances (Ordinances 05-14, 06-1, and 06-18 for FY 2006, and Ordinance 06-32 and 06-44 for FY 2007), unaudited financial statements for FY 2006, and the December 2006 accounting reports from the department of budget and fiscal services. Our review of expenditures includes all fund sources, while the review of revenues only covers the general fund.

A. Review of FY 2006

1. General Fund Overview

Overall, for FY 2006, actual general fund revenues totaled \$929 million, which was \$8 million more than the \$921 million estimated in the budget (these figures include revenues, other financing sources (i.e. sale of assets), transfers in, and unreserved fund balance from prior year). Actual general fund expenditures for executive and legislative departments, miscellaneous expenses and debt service totaled \$855 million, which was \$65 million lower than the \$920 million budgeted (these figures include expenditures from departments, miscellaneous and debt service; other financing uses; and transfers out). The actual unreserved and undesignated fund balance for FY 2006, an amount which is carried over into FY 2007, totaled \$77 million, which was over \$34 million more than the budgeted fund balance of \$42 million. The \$77 million fund balance computes to 8 percent of expenditures, a favorable increase over the 5 percent ratio that was budgeted.¹

¹ The Government Finance Officers Association, a standard-setting professional association, recommends an unreserved fund balance in the general fund of no less than five to 15 percent of operating revenues.

2. Significant Revenue Variances for General Fund, FY 2006

The following table shows general fund revenue sources with a variance of \$1 million and five percent or more between actual and budgeted revenue amounts for FY 2006. Negative amounts mean actual revenues were below the amounts budgeted.

**Table III-1. FY 2006 Major
General Fund Revenue Variances**

General Fund Revenue Source	Variance From Budget	Percent of Budgeted Amt
Investments	\$5,413,207	88%
Recoveries – State Emergency Ambulance Service	\$1,796,247	8%
Sundry.refunds – prior expenditures	\$1,856,862	139%
Recovery – CASE, BWS	-\$4,768,000	-100%

3. Significant Expenditure Variances for FY 2006

The following table summarizes major general fund expenditure variances by function and department. Since expenditures cannot exceed the amount appropriated, variances reflect the amount by which actual expenditures were less than budgeted amounts. For the purposes of this summary, we only included variances at least \$1 million and five percent below budgeted amounts, and only included budgeted activities.

**Table III-2. FY 2006 Major
General Fund Expenditure Variances**

Function/Department/Activity	Variance from Budget	Percent of Budgeted Amt
General Government/ Corporation Counsel/ Legal Services	-\$1.1 million	-17%
Debt Service/ Bond Principal and Interest, City and County Bonds	-\$18.6 million	-10%
Debt Service/ Tax Exempt Commercial Paper Payments	-\$3.5 million	-56%
Public Safety/ Emergency Services/ Emergency Medical Services	-\$1.3 million	-7%
Miscellaneous/ Hawaii Employer-Union Health Benefits Trust Fund	-\$5.2 million	-9%
Miscellaneous/ Worker's Compensation	-\$3.4 million	-35%
Miscellaneous/ Provision for Salary Adjustment and Accrued Vacation Pay	-\$9.0 million	-100%

4. Major Appropriation Lapses by Activity, FY 2006

In Table III-3 below, we have highlighted the major appropriation lapses for FY 2006, by budgeted activity, based on the detailed information in Table IV-2 that follows. We included lapses that were at least \$1 million and five percent of adjusted appropriations, only included budgeted activities, and excluded federal and state grants from funds such as the Federal Grants Fund and the Special Projects Fund.

**Table III-3. FY 2006 Major
Appropriation Lapses by Activity**

Dept/Activity	Adjusted Appropriation	Lapsed Amt	Percent of Appropriation
General Government/ Corporation Counsel/ Legal Services	\$6,977,653	-\$1.2 million	-17%
General Government/ Design and Construction/ Project and Construction Management	\$14,363,547	-\$1.5 million	-11%
Culture and Recreation/ Parks and Recreation/ Grounds Maintenance	\$19,648,907	-\$1.1 million	-6%
Culture and Recreation/ Enterprise Services/ Golf Courses	\$8,414,094	-\$1.0 million	-12%
Sanitation/ Environmental Services/ Refuse Collection and Disposal	\$124,431,239	-\$7.5 million	-6%
Sanitation/ Environmental Services/ Administration	\$6,118,782	-\$1.6 million	-26%
Sanitation/ Environmental Services/ Environmental Quality	\$8,924,575	-\$2.0 million	-23%
Sanitation/ Environmental Services/ Collection System Maintenance	\$9,528,742	-\$1.7 million	-18%
Sanitation/ Environmental Services/ Treatment and Disposal	\$44,482,082	-\$5.0 million	-11%
Debt Service/ Bond Principal and Interest	\$228,386,562	-\$29.2 million	-13%
Debt Service/ Tax Exempt Commercial Paper	\$6,354,630	-\$3.5 million	-56%
Miscellaneous/ Health Fund	\$76,398,015	-\$5.2 million	-7%
Miscellaneous/ Workers' Compensation	\$12,939,025	-\$4.4 million	-34%
Miscellaneous/ Provision for Salary Adjustments and Accrued Vacation Pay	\$9,118,394	-\$9,118,394	-100%

5. Detailed Expenditure Results by Activity, FY 2006

Table III-4 displays expenditure results of activities in the FY 2006 executive operating budget ordinance, listed by agency in the order it appears in the ordinance. In addition, the activity "Other Grants", which is an item found occasionally only in the accounting reports, is added under the appropriate agency. For each activity, the amounts appropriated, expended/encumbered, and lapsed in the fiscal year are shown. Included is the percentage of the activity's appropriation that the lapsed amount represents. Activities where the lapsed amount equaled or exceeded \$1 million and five percent of the adjusted appropriation are highlighted, but only if the lapsed amount and percentage continue to meet the criteria after excluding grant funds from any source. For each activity, the following information is provided regarding its status at the end of the fiscal year:

- (1) Total appropriated amount as shown in the budget ordinance.
- (2) The total appropriated amount as may be adjusted by any transfers and grants, whether from state or federal sources. The adjusted amount may be higher than the initial appropriation if a transfer or grant added to the amount appropriated. Alternatively, the adjusted amount may be lower than the initial appropriation if a transfer reduced the amount appropriated to that activity or if a grant was less than budgeted.
- (3) The amount of the adjusted appropriation that was expended or encumbered during the fiscal year.
- (4) The amount that lapsed at the end of the fiscal year and its percentage of the adjusted appropriation.

Table III-4
EXECUTIVE OPERATING BUDGET
Appropriations for FY 2006, All Funds

TOTAL	\$1,382,006,658	\$1,425,345,336	\$1,294,177,421	\$131,167,915	9.20%

B. Review of FY 2007 Through 12/31/06

We reviewed the status of the operating budget for FY 2007 as of 12/31/06. The review covered major general fund revenue assumptions and major program changes in budgeted expenditures for all funds. The revenue assumptions and program changes were found in the budget ordinance or executive operating program and budget.

Please note that the review of FY 2007 revenues and expenditures covers only the first half of the fiscal year, and that substantial changes in revenues and expenditures can occur during the last six months of the fiscal year. Because the review covers only the first half of the fiscal year, no overall budget results can be determined.

1. Status of FY 2007 General Fund Revenue Assumptions

The following table describes the status as of 12/31/06 of major general fund revenue assumptions for FY 2007. For the purpose of this summary, we define major revenue assumptions as those that involve an amount exceeding \$1 million and concern either new sources to the city or a significant increase in existing sources. As an example, changes in transfers between funds were not part of this review.

**Table III-7. FY 2007 Major General Fund Revenue
Assumptions**

General Fund Revenue Assumption	Amount Budgeted	Status As of 12/31/06
Real property tax revenues – current year. Budgeted amount (as amended by Council) increased by \$92 million or 16% from prior fiscal year.	\$674,959,800	\$99,251,351 received
Public Service Company Tax. Budgeted amount increased by \$1.4 million of 5% from prior fiscal year.	\$30,059,000	\$16,843,514 received
Transient Accommodation Tax. Budgeted amount increased by \$2.1 million or 5% from prior fiscal year.	\$43,991,000	\$21,792,017 received
Excise Surcharge – Transit. New budgeted item. (Collection begins January 1, 2007.)	\$45,000,000	\$0 received
Recovery – State Emergency Ambulance Service. Budgeted amount increased by \$3.4 million or 16% from prior fiscal year.	\$25,400,000	\$9,920,304 received
Unreserved Fund Balance. Budgeted amount (as amended by Council) decreased by \$15 million or 26% from prior fiscal year.	\$42,308,865	\$76,604,000 received

2. FY 2007 Status of Program Changes in Budgeted Expenditures, All Funds

The following table describes the status as of 12/31/06 of major program changes contained in the FY 2007 budget. We defined major program changes as new or increased expenditures that exceeded \$1 million and increased the prior year's appropriation by at least 10 percent. Further, we defined major program changes as those that represent policy changes rather than cost increases due to inflation, negotiated salary increases or similar nonpolicy-related changes. All major program changes in the budget are listed, even where the status cannot be determined from reports that we reviewed.

Table III-8. FY 2007 Major Program Changes (All Funds)

Item	Amount Budgeted	Status As Of 12/31/06
Department of Budget and Fiscal Services/ Treasury (increased current expense funds). For the State's collection of the county surcharge on state tax.	\$5,602,163	Cannot determine the status of this change from monthly accounting reports.
Department of Information Technology/ Administration (increased equipment funds).	\$2,299,705	Cannot determine the status of this change from monthly accounting reports.
Department of Planning and Permitting/ Administration (increased total funding).	\$3,138,466	\$722,087 expended.
Department of Planning and Permitting/ Site Development (increased salary funds).	\$3,555,087	Cannot determine the status of this change from monthly accounting reports.
Department of Facility Maintenance/ Public Building and Electrical Maintenance (increased total funding).	\$18,269,997	\$7,068,681 expended.
Department of Design and Construction/ Project and Construction Management (increased total funding).	\$17,667,248	\$5,427,632 expended.
Department of Emergency Services/ Ocean Safety (increased total funding).	\$8,005,643	\$3,511,328 expended.
Department of Facility Maintenance/ Automotive Equipment Services (increased total funding).	\$16,440,196	\$6,676,381 expended.
Department of Facility Maintenance/ Road Maintenance (increased total funding).	\$19,335,960	\$7,624,436 expended.

Department of Environmental Services/ Administration (increased current expense funds).	\$6,564,797	Cannot determine the status of this change from monthly accounting reports.
Department of Environmental Services/ Refuse Collection and Disposal (increased salary funds).	\$22,642,985	Cannot determine the status of this change from monthly accounting reports.
Department of Environmental Services/ Environmental Quality (increased salary funds).	\$5,694,580	Cannot determine the status of this change from monthly accounting reports.
Department of Environmental Services/ Collection System Maintenance (increased salary funds).	\$7,128,097	Cannot determine the status of this change from monthly accounting reports.
Department of Environmental Services/ Treatment and Disposal (increased current expense funds).	\$32,235,328	Cannot determine the status of this change from monthly accounting reports.
Department of Community Services/ Administration (increased current expense funds).	\$5,133,807	Cannot determine the status of this change from monthly accounting reports.
Department of Transportation Services/ Transportation Planning (increased current expense funds).	\$3,457,504	Cannot determine the status of this change from monthly accounting reports.
Department of Transportation Services/ Public Transit (increased current expense funds).	\$75,267,030	Cannot determine the status of this change from monthly accounting reports.

IV. Executive Capital Budget

Fiscal Year 2006 Fund Expenditure Status 18-Month Period Ending 12/31/06

This is a comparison of actual versus budgeted revenues and expenditures for the executive capital budget. The review covers the effective appropriation period for the FY 2006 capital budget that runs from July 1, 2005 through December 31, 2006, beyond which date appropriations that were not yet encumbered or expended lapsed pursuant to charter. The review is based on information in the executive capital budget ordinance (Ordinance 05-23) and a December 2006 accounting report from the department of budget and fiscal services.

Overview:

- The FY 2006 largest lapse amount was the Solid Waste to Energy Facility appropriation.
- The budget function that experienced the highest rate of lapses in FY 2006 was Culture-Recreation (26.8 percent of adjusted appropriations lapsing).
- The source of funding that experienced the highest rate of lapses in FY 2006 was the Solid Waste Improvement Bond Fund (83.3 percent of adjusted appropriations lapsing).

A. Major Project Lapses and New Appropriations

In Table IV-1 below, we have highlighted the major project lapses for FY 2006, based on the detailed information in Table IV-2 that follows. The criteria were:

- (1) Projects having adjusted appropriations of \$1 million or more; and
- (2) Lapses of 60 percent or more of the adjusted appropriation that were incurred at the end of the 18-month period.

We also highlighted projects whose adjusted appropriations were \$1 million or more over the amount in the budget ordinance (marked as "NEW" in the table). The following projects met the above criteria:

Table IV-1. Major Project Lapses and New Appropriations

Function	Project	Adjusted Appropriation	Lapsed Amount
Public Safety	Waianae Coast Alternate Route	1,503,000	987,067
Public Safety	Computerized Traffic Control Center (NEW)	3,581,387	2,064,734
Highways and Streets	Street Improvements	1,500,000	1,500,000
Highways and Streets	Kamokila Boulevard Extension	1,000,000	1,000,000
Highways and Streets	Rehabilitation of Streets (NEW)	9,439,400	205,571
Highways and Streets	Salt Lake Boulevard Widening (NEW)	3,613,244	1,820,170
Sanitation	Solid Waste to Energy Facility	34,993,000	34,993,000
Sanitation	Waimalu Sewer Rehabilitation/Reconstruction	16,801,000	15,501,000
Sanitation	Wastewater Facilities Replacement Reserve	3,000,000	1,947,336
Culture-Recreation	Waikiki War Memorial Complex/Waikiki Beach	5,800,000	5,300,000
Utilities	Intra-Island Ferry	6,700,000	6,278,857
Utilities	Bus and Handi-Van Acquisition Program (NEW)	21,760,000	3,738,265
Utilities	Middle Street Intermodal Center (NEW)	7,386,100	0
Utilities	Waianae Transit Center	1,697,840	343,520

B. Detailed Results by Function

Table IV-2 displays all of the projects in the FY 2006 executive capital budget ordinance. For each project, the following information is provided regarding its status at the end of the 18-month period:

- (1) Total appropriated amount as shown in the budget ordinance, as amended.
- (2) The total appropriated amount as may be adjusted by any applicable grants, whether from state or federal sources. The adjusted amount may be higher than the initial appropriation if the grant adds to the amount appropriated. In rare instances, the adjusted amount may be lower than the appropriation. That may occur if the grant was anticipated at the time of appropriation but the amount received was less.
- (3) The amount of the adjusted appropriation expended during the 18-month period.
- (4) The amount of the adjusted appropriation encumbered at the end of the 18-month period.
- (5) The amount of the adjusted appropriation that lapsed at the end of the 18-month period.

We have highlighted the major project lapses for FY 2006, based on the following:

- (1) Projects having adjusted appropriations of \$1 million or more; and
- (2) Lapses of 60 percent or more of the adjusted appropriation that were incurred at the end of the 18-month period.

We also highlighted any projects whose adjusted appropriations were \$1 million or more over the amount in the budget ordinance.

C. Summary of Results

In Table IV-3 below, the results are summarized by budget function (e.g. General Government, Public Safety, etc.) and by fund source. Among other things, this summary reveals which budget functions and fund sources are subject to large lapses in appropriations. As shown in the table, among budget function areas, the culture-recreation function had the largest relative lapses at 26.8 percent of adjusted appropriations. Among fund sources, the solid waste improvement bond fund had the largest relative lapse of all of the fund sources at 83.3 percent.
